EDUCATION

Utah State University – Jon M. Huntsman School of Business

Logan, UT

Bachelor of Arts, Information Systems; Minor: Data Analytics

May 2025

- GPA: 3.99 while working 20 hours per week

TOOLS

- **Languages:** Python, SQL, JavaScript, Typescript, HTML, CSS, Java
- **Technologies:** Tableau, Microsoft Excel, Microsoft SSMS, Microsoft Access, AWS, Web JSON API, MongoDB, Sequelize, React, Node.js, Git, GitHub

WORK EXPERIENCE

EFORCE

Providence, UT

Software Support Technician

Oct 2025 – Present

- Developed 60+ SQL reports (10–300+ lines each) supporting operational and analytical reporting for multiple law enforcement agencies
- Gather reporting requirements from law enforcement stakeholders and translated business needs into SQL-based reporting solutions
- Analyze software workflows and relational database structures to identify, validate, and extract accurate datasets for operational and analytical reporting
- Support software developers by reproducing, documenting, and reporting software bugs based on client-reported issues
- Communicate technical issues and reporting results to non-technical stakeholders, ensuring accurate understanding of software behavior and data outputs

ATAT Inc.

Logan, UT

Database & Inventory Manager

Feb 2022 – Oct 2025

- Managed and analyzed a 1,000+ SKU inventory database supporting purchasing decisions for \$7M+ in annual revenue
- Designed a sales forecasting system using Microsoft Access and Excel to predict demand and optimize inventory purchasing decisions
- Developed automated dashboards in Excel, Access, and Google Sheets to improve inventory visibility, reduce errors, and accelerate the production workflow
- Performed data analysis on historical sales and inventory patterns to determine optimal purchasing quantities across seasonal demand cycles
- Built SQL and Excel reporting tools to analyze sales trends, seasonality, lead times, and reorder points, reducing stockouts through data-driven purchasing decisions

PROJECTS

LaserCutter3D

Feb 2026 - Present

Next.js, Typescript, Three.js, PostgreSQL, Prisma, Supabase

- Built a full-stack 3D laser cutter design web application for 3D part assembly and manipulation
- Developed an SVG importer, persistent 3D workspace, and interactive editing features
- Implemented authentication, protected routes, global state management, and a recoverable soft-delete system

Stock Market Trading Simulation

April 2024

Python

- Developed Python trading algorithms implementing momentum, moving average crossover, and mean reversion strategies using real-time market data on AWS

VOLUNTEER / LEADERSHIP

The Church of Jesus Christ of Latter-day Saints

Buenos Aires, Argentina & Roseville, California

Full-Time Volunteer

Dec 2018 – Nov 2020

- Led and collaborated with diverse teams while teaching and mentoring full-time for two years
- Developed strong communication and leadership skills in English and Spanish
