EDUCATION

Utah State University – Jon M. Huntsman School of Business Logan, UT
Bachelor of Arts, Information Systems: Web Development emphasis; Minor: Data Analytics May 2025

- GPA: 3.99

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, HTML, CSS, Python, SQL, Java
- **Databases:** SQL Server, PostgreSQL, MongoDB, Microsoft Access
- **Frameworks:** React, Next.js, Express.js, Node.js
- **Tools:** Git, GitHub, Azure DevOps, Visual Studio, AWS, SSMS, Supabase, Excel, Tableau

PROFESSIONAL EXPERIENCE

EFORCE Providence, UT
Software Support Technician Oct 2025 – Present

- Implemented a full-stack bug fix using C#, HTML, and SQL to improve report accuracy
- Built and optimized a SQL Server stored procedure with 16 CTEs and 43 queries for jail reporting across 400+ law-enforcement agencies; merged via Git/Azure DevOps for production deployment
- Developed 80+ ad hoc SQL reports ranging from 10-300 lines supporting operational and analytical requests from law enforcement agencies
- Investigated, reproduced, and documented 100+ software bugs by analyzing application workflows, SQL databases, and source code, providing developers with detailed replication steps and technical findings
- Configured API and SFTP integrations between external agency systems and the application

ATAT Inc. Logan, UT
Database & Inventory Manager Feb 2022 – Oct 2025

- Managed and improved database of ~1,000 products to support decisions driving $7M+ in revenue
- Wrote SQL queries to streamline inventory management, and support business decision-making
- Developed automated inventory dashboards in Access, Excel, and Google Sheets, resulting in significantly fewer inventory errors and faster product location times

PROJECTS

Arbol3D Feb 2026 - Present
Next.js, Typescript, Three.js, PostgreSQL, Prisma, Supabase

- Built a full-stack 3D laser cutter design tool for real-time 3D part assembly and manipulation
- Created an SVG importer to parse and normalize SVG files to mm's for laser-cutter-compatible export
- Designed a soft-delete and cascade-delete system with full recovery for shapes, parts, and projects

Full-Stack Recipe Storing Web App Apr 2025
MERN Stack (MongoDB, Express.js, React, Node.js)

- Developed and deployed full-stack app with React, Express.js, and MongoDB, hosted on AWS EC2
- Created RESTful APIs with Express and Mongoose for frontend-backend data flow
- Built responsive UI with React and MUI, including forms, dynamic rendering, and state management

Conversion of Static HTML to Dynamic Express.js MVC Web App Feb 2025
Express.js

- Modularized components and integrated Sequelize with SQL database for data management
- Built RESTful routes, linked controllers and models, and rendered dynamic content with EJS templates
- Developed a user-generated content feature with a post form for data submission

VOLUNTEER / LEADERSHIP

The Church of Jesus Christ of Latter-day Saints Buenos Aires, Argentina & Roseville, California
Full-Time Volunteer Dec 2018 – Nov 2020

- Led and collaborated with diverse teams while teaching and mentoring full-time for two years

- Developed strong communication and leadership skills in English and Spanish
